SOFTWARE ENGINEER

New Software Engineer graduate with a passion to create and improve. I enjoy diving into the world of code to develop and create. I love learning and being challenged with difficult problems. I hope to find a position where I can bring my skills in problem-solving, creativity, and strategic thinking.

TECHNICAL SKILLS

React.js | Redux.js | HTML | CSS | JavaScript | JSON | MS SQL | Ruby on Rails | | Ruby | Git | Routes | Bootstrap | RESTful API | Sinatra | Python | Visual Studio Code | Node.js | .Net Core | C#

TECHNICAL PROJECTS

Real Estate - [Github](#) | [Demo](#)

Real Estate listings app was created so Real Estate companies can showcase what is available. Features full Google and github login and user authentication. An additional feature includes functionality of password encryption using bcrypt.

- Utilized bcrypt to store encrypted user information server-side
- Created user validations and permissions
- Designed layout with Bootstrap. Incorporated image uploading with imagemagick

Local Events- [Github](#) | [Demo](#)

Users are able to create a city and create events within that city. Local Events uses Ruby on Rails as an API and Javascript as the frontend. This project demonstrates proficiency in design and architect features across frontend and backend as well as creating an SPA.

- Built API that shows events
- Integrated Javascript and Rails to showcase backend and frontend framework
- Used of ES6 & object orientation

National Park - [Github](#) | [Demo](#)

Displays all of the national parks and campgrounds in the USA. Uses the National park API seeded to Ruby on Rails as an API.

- Demonstrates skills in API data management
- Utilizes React and Redux
- Designed and architected features across frontend and backend

EXPERIENCE

Centers for Dialysis Care
